

# **ONESITESTOP-WEB SOLUTION**

Summer Internship Project Report

Submitted in Partial Fulfilment of the Requirements

For the award of the Degree of

**Bachelor of Technology**

**In**

**Electronics & Computer Engineering (ECM)**

**By**

**T.Rohit(19311A1957)**

**K.Lakshana(19311A1933)**

Under the guidance of

**V. SOUJANYA**

**Asst.Professor, ECM**

**Department of Electronics & Computer Engineering**

**Sreenidhi Institute of Science & Technology (Autonomous)**

**January – 2022**

**DEPARTMENT OF ELECTRONICS AND COMPUTER ENGINEERING**  
**SREENIDHI INSTITUTE OF SCIENCE AND TECHNOLOGY**  
**(AUTONOMOUS)**

**CERTIFICATE**

This is to certify that the summer internship Project work entitled “**ONESITESTOP-WEB SOLUTIONS**”, submitted by **T.ROHIT(19311A1957), K.LAKSHANA(19311A1933)** towards partial fulfilment for the award of Bachelor’s Degree in Electronics & Computer Engineering from Sreenidhi Institute of Science & Technology, Ghatkesar, Hyderabad, is a record of bonafide work done by them. The results embodied in the work are not submitted to any other University or Institute for award of any degree or diploma.

V. Soujanya,  
Assistant Professor, ECM  
Project Supervisor

External Examiner

Dr. D. Mohan,  
HOD,ECM

## CERTIFICATE OF COMPLETION

### To Whomsoever It May Concern

We are glad to inform you that **Mr. T.ROHIT** from Sreenidhi Institute of Science and Technology, Hyderabad, Has successfully completed his Three Month long internship at Numeric HR Solutions (OPC) Private Limited from **30th September 2021 to 24th December 2021**.

During his internship, he was exposed to various activities in web development and cloud computing Division.

We found him extremely inquisitive and hardworking. He was very much interested to learn the functions of our core division and also willing to put his best efforts and get into the depth of the subject to understand it better.

His association with us was very fruitful and we wish him all the best for his future endeavors.

### Authorized Signatory

## ACKNOWLEDGMENT

We owe a great many thanks to a great many people who have helped and supported us throughout this project, which would not have taken shape without their co-operation. Thanks to all.

We express our profound gratitude to **Dr.T.Ch. Siva Reddy, Principal** and indebtedness to our management Sreenidhi Institute of Science and Technology, Ghatkesar for their constructive criticism.

We would like to specially thank our beloved **Head of Department, ECM, Dr. D. Mohan**, for his guidance, inspiration and constant encouragement throughout this research work.

We would like to express our deep gratitude **V. Soujanya., Asst Professor (Project Coordinator)**, for her timely guidance, moral support and personal supervision throughout the project.

These few words would never be complete if we were not to mention our thanks to our parents, Department laboratory, staff members and all friends without whose co-operation this project could not have become a reality.

**T.ROHIT (19311A1957)**

**K.LAKSHANA (19311A1933)**

## **DECLARATION**

We, **T. Rohit(19311A1957)** and **K. Lakshana(19311A1933)**, students of **SREENIDHI INSTITUTE OF SCIENCE AND TECHNOLOGY, YAMNAMPET, GHATKESAR**, studying III<sup>rd</sup> year I<sup>st</sup> semester, **ELECTRONICS AND COMPUTER ENGINEERING** solemnly declare that the Summer Industry Internship Project report, titled “**ONESITESTOP-WEB SOLUTIONS**” is submitted to **SREENIDHI**

**INSTITUTE OF SCIENCE AND TECHNOLOGY** for partial fulfillment for the award of degree of Bachelor of technology in **ELECTRONICS AND COMPUTER ENGINEERING**.

It is declared to the best of our knowledge that the work reported does not form part of any dissertation submitted to any other University or Institute for award of any degree.

**T.ROHIT(19311A1957)**

**K.LAKSHANA(19311A1933)**

## **CONTENTS**

|   |             |
|---|-------------|
| Abstract  | <b>1</b>    |
| Chapter 1 Introduction                                | <b>2</b>    |
| Chapter 2 Objective                                   | <b>3</b>    |
| Chapter-3 Project and Source Code                     | <b>4-26</b> |
| Chapter 4- Conclusion and Future scope of the project |             |

## **ABSTRACT**

### **Problem Statement:**

The more the merrier but the more the chefs spoil the broth goes the saying. Similarly, the internet is flooded with a vast range of applications and information. These information were uploaded and applications were developed to make our lives easier and smoother. But vast amounts of information with different convictions and malicious contents with backend phishing has become a real problem.

### **Problem Solution:**

Software as a service is a model of software development where an application is hosted as a service to provide customers across the internet. By eliminating the need to install and run the applications on the customer's own. We have developed and still working towards making a web application that puts all authenticated data of different domains on one platform. Making it easy to find data, which above convenience is about authenticity.

# **CHAPTER 1**

## **INTRODUCTION**

### **1.1 Web Development:**

Web Development comprehensively refers to the tasks associated with developing online portals for hosting via the internet or intranet. The web development process incorporates website composition, web content development, customer-side/serverside scripting, system security setup, and other associated tasks. It empowers site functionalities according to the proprietor's prerequisites. Web Portal development ranges from making plain content pages to complex electronic applications, informal community applications, and electronic business applications. It follows a certain degree of the progressive system i.e.: -

1. Customer side Coding
2. Server-side Coding
3. Database Innovation

### **1.2 Cloud Computing:**

Cloud Computing refers to the idea of on-demand, pay as you go, IT services that are delivered over the internet. The main benefits of cloud computing include:

- On-demand
- Pay-As-You-Go
- Scalability
- Delivered over the internet
- Highly Automated

Cloud Computing is an innovation that utilizes one remote server and the web to look after various information and applications. Cloud Computing gives significant financially savvy IT assets as a cost on request IT-dependent on the real use of the client. Because of fast development, numerous organizations can't deal with their IT necessity much after having an inhouse data center.

## **Chapter 2**

### **OBJECTIVES**

#### **WHY THIS IS A PROBLEM?**

In today's world, we have ample of data and information. Way too many resources to gather or look around. At the same time, it is very difficult to find out which and what resource or data is genuine. Phishing and data faking for the versatile sakes of making money and scamming people has increased vastly in the past decade. Authenticity of the source and the data provided is very important.

Integrating different systems and algorithms in order to first authenticate the data being presented is one part of the site.

Next major hurdle, we plan to overcome with our web application is options. And support.

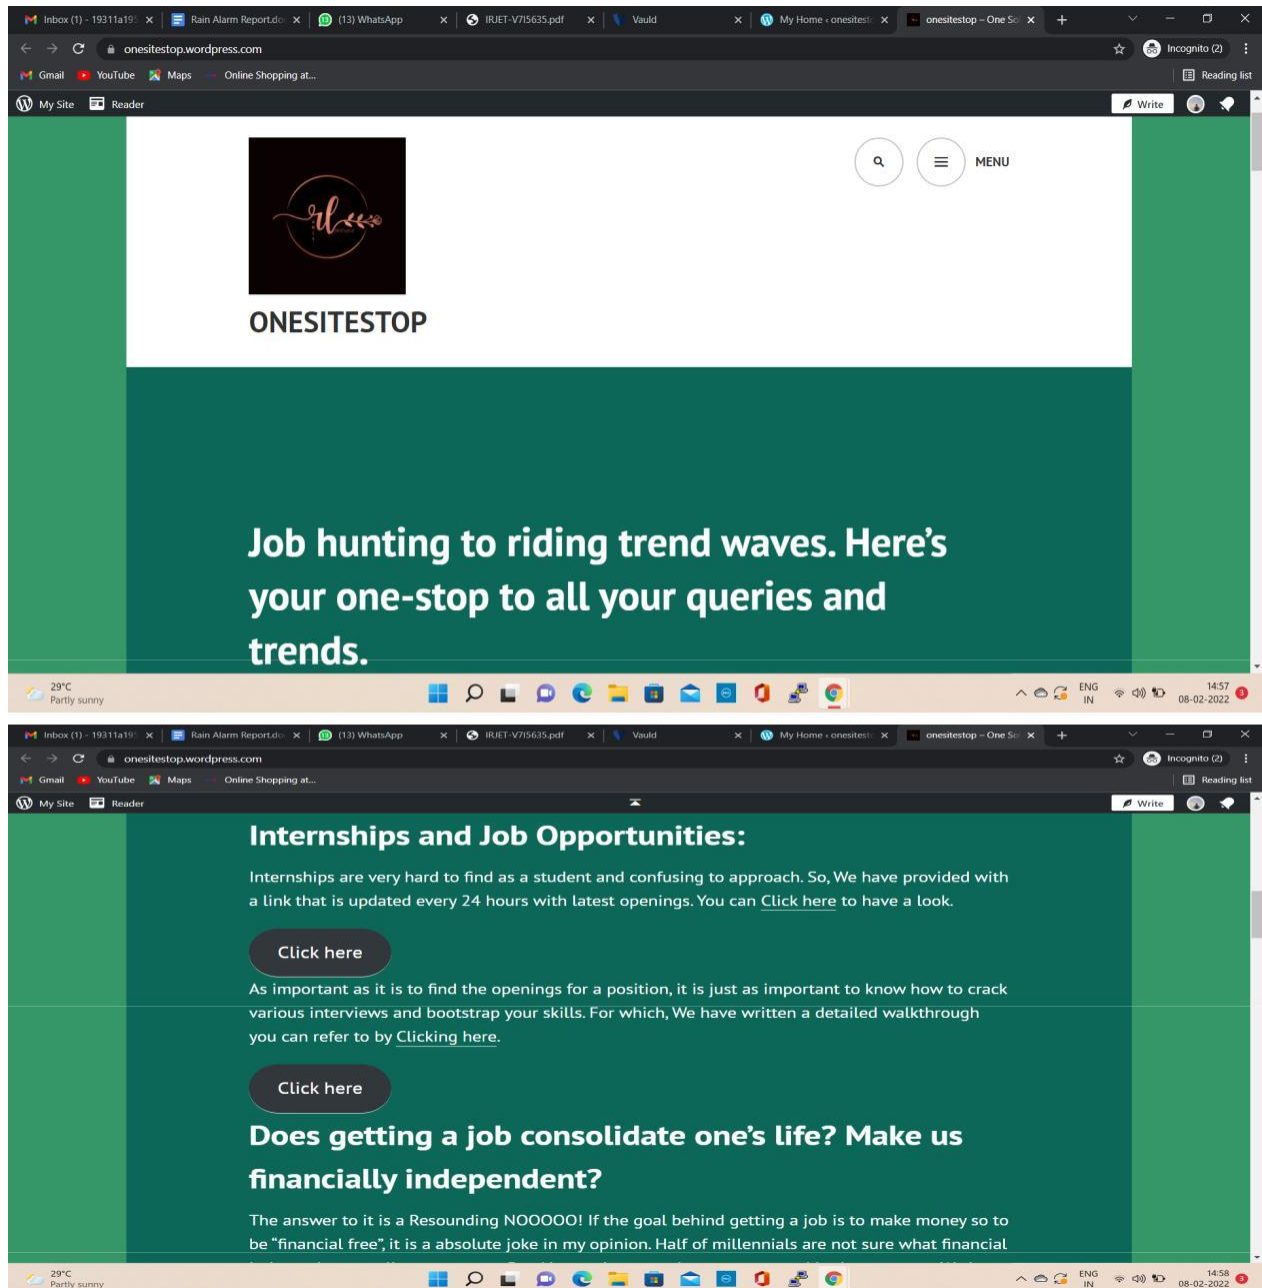

The option of finding all the choices you have available all over the internet at one fine stop is much better to keep track of too instead of jumping from site to site in hopes to finding the right content.

This way, we solve two major issues of eliminating security threats and eliminating redundancy of data or sources to the user for a overall better experience.

## About

Rohit, Lakshana are students currently pursuing their Bachelors in Electronics and Computer Science.

We aspire to create solutions with the learning and implication of evolving technology. We went from staring blankly into their laptop screens most of the time, to learning and growing our productivity.

## **CHAPTER 4**

### **CONCLUSION AND FUTURE SCOPE**

Irrespective of what the future holds, we know for sure that internet and web applications are going to hold it together. And traditional web applications, while good, need a lot of refinement which is offered by cloud computing. Addition to which we have used machine learning and Deep learning and SEO intelligence to make the scope wider and incorporate a larger amount of features and framework than traditional applications.

Moving forward, We plan to widen our scope and horizons by introducing new technologies for refinement of the applications and more functionalities such as Blockchain and Crypto Payments and so on. Our project is partially proprietary to our mentors in our interim company, so we cannot disclose all the features and plans.
